

# Full Arch Immediate Load Course

Friday 22<sup>nd</sup> June

LIVE SURGERY IS THE FOCUS OF THIS ADVANCED SURGICAL PROGRAMME, DESIGNED FOR DENTISTS WHO ARE ALREADY PLACING IMPLANTS AND WISH TO INCREASE THEIR CLINICAL EXPERIENCE IN FULL ARCH IMMEDIATE LOADING CASES.

## Course Summary

This one-day course of live surgery and lecture covers teeth in a day and immediate loading with digital workflow. We will utilise digital planning incorporating digital smile design, to allow ideal implant placement using surgical guides. In addition, a DSD bridge will be prefabricated and screwed in, during the teeth in a day procedure.

## Educational outcome

The course aims to help participants move on to the next level, providing patients with an ultra-convenient surgical restorative solution. Delegates should feel more confident managing bone deficiencies and undertaking immediate implant cases.

## 8 hours verifiable CPD

### Detailed Programme

- Advanced immediate loading
- Simultaneous implant placement
- Indications/contra-indications for immediate loading
- Digital Workflow incorporating digital smile design
- Practical treatment planning
- Guided surgery
- Running an implant practice - tips and tricks

On-site technician – Mark Ambridge.

# Dr. Rory McEnhill BDS, MSc, MFGDP (UK)

BLUE SKY DENTISTRY, BELFAST, NORTHERN IRELAND

Rory is a highly experienced, award winning clinician with a special interest in Restorative/Aesthetic Dentistry and Implantology. He has won multiple awards at the UK Aesthetic dentistry awards as well as his practice, Blue Sky Dentistry, having won multiple industry awards.

Rory completed his MSc in Aesthetic and Restorative Dentistry from the University of Manchester in 2013. Wherever possible, Rory looks to implement digital workflow into all his surgical and restorative planning and treatments.

From 2018 on, Rory will be commencing a 2-day UK wide course focusing on advanced implant treatments that will run twice yearly. This course will focus on advanced implant techniques such as Khoury's autogenous bone grafts, partial extraction therapy (socket shield) and digitally driven immediate loading full arch/mouth implant rehabilitation.
