

Guided Implant Surgery and its multiple applications - the periodontists way

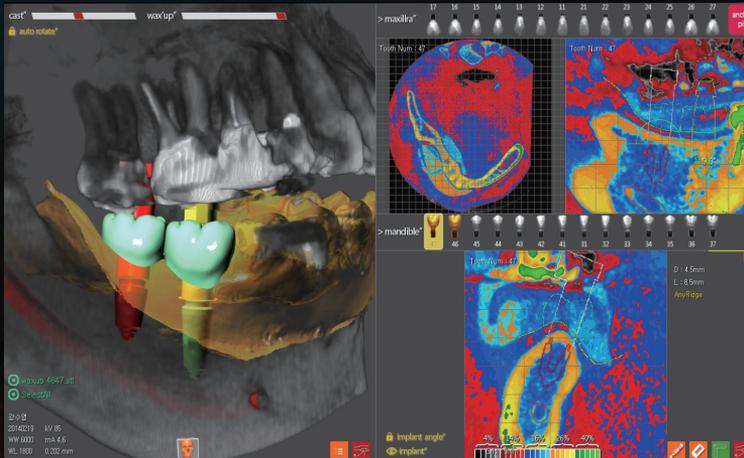

Dr Roberto Rossi - Tuesday 19th March 2019

Course Outline

Guided implant surgery is a new and powerful diagnostic tool. It serves the dental clinician for dental implants along with many other purposes. The goal of this presentation will be to explore the multiple different aspects of this practice and to highlight how useful the tool can be in aesthetic cases. It is a completely different approach, where the clinician builds the hard and soft tissue beforehand and then takes advantage of guided implant surgery to refine details and idealize the final outcome.

TIME: 18:00 (18.30 start) - 21:00

2.5 hours verifiable CPD

COURSE FEE: £50.00, to be refunded upon attendance.

VENUE: The Village Hotel Club Solihull, The Green Business Park,
Dog Kennel Lane, Shirley, B90 4JG
