

# Full Arch Immediate Implant Loading Live Surgery Course

Crossbank  
dental care

"Most patients have the option to eliminate their denture(s) and they are beginning to look for alternatives. You could be the one to introduce them to that alternative and change their lives."

## Course Outline

Witness our experienced surgeon/technician team place 4 or more implants and provide an immediate fixed provisional restoration.

Suitable for any colleague who;

- wishes to improve their understanding of how the 'Immediate Implant Loading' concept works for a full arch restoration
- wants to confidently discuss such options with their patients
- is interested in developing the knowledge and skill to restore such cases
- wishes to expand their own surgical skill and repertoire
- wants to work in close collaboration with a technician to achieve life changing results.

## Objectives

Develop your understanding of implant treatments related to 'Teeth-in-A-Day' and immediate loading procedures. Allowing you to identify appropriate patients and enabling discussion with them regarding implant supported bridges, thereby improving the dentist/patient relationship. You will gain sufficient knowledge to give patients a good description of what is possible and how it can be achieved.

## Learning Outcomes

By the end of the day participants will:

- understand how patients can be rendered denture free and achieve fixed teeth in one session.
- understand the procedures and protocols of the concept
- realise the benefits of high performance polymers (PEEK) for full arch bridges
- understand how to remove/replace a provisional bridge and make a transfer impression of the abutment/implant complex.

Come and be our guests, experience it first hand and improve your understanding of what implants can achieve.

## Crossbank Study Club Teachers

### Neil Cooper, Dental Surgeon

BDS MFGDP(UK) DipImpDent RCS(Eng) Adv Cert FFGDP (UK)

Member of the Association of Dental Implantologists.

Full Member of the British Academy of Aesthetic Dentistry.

Neil Cooper has an extensive knowledge and ability in the placement and restoration of dental implants, with particular attention to the reconstruction of failing teeth and complete toothlessness. He has a passion for making patients' smiles naturally beautiful by achieving harmony between the teeth, gums, lips and face.

Neil is the principal at Crossbank Dental Care, an implant referral practice in Kendal, Cumbria and is an active full member of the British Academy of Aesthetic Dentistry. He is also a visiting implant surgeon and prosthodontist with The Face Team at 69 Harley Street, London, where he has been involved in the development and delivery of a year-long teaching programme for dentists.

### Steve Taylor

DipS(Implantology) Dip Clin Dent Tech FBIDST

Member of the British Academy of Aesthetic Dentistry (BAAD) and a member of the ADI.

Steve Taylor gained City and Guilds qualification in 1978, he has since obtained a Diploma in Technical Implantology from MMU and graduated as a Clinical Dental Technician from UCLan in 2013.

He regularly lectures throughout the UK on a range of subjects such as occlusion, ceramics, smile design, and implantology. He was awarded Contributor of the Year in 2010 by the Dental Laboratory Journal. He is a certified PTC trainer.

He is Chairman and was awarded Fellowship of the British Institute of Dental and Surgical Technologist (BIDST).

Fees: £395  
including  
refreshments
