

UNLOCK THE POTENTIAL OF IMMEDIATE IMPLANTOLOGY IN YOUR DAILY PRACTICE

COURSE SYNOPSIS

Implantology with immediate loading protocols has strongly become a part of our daily practice, either for its effectiveness or the pressing demands of our patients. Being able to handle immediate loading in every aspect for us is mandatory, especially if we want to be successful and continuously up to date.

We will describe the scientific background of the procedure and the possibility of using immediate implants for the replacement of hopeless teeth. Immediate implant placements have many advantages such as fewer surgical procedures, decreased treatment time and faster patient results.

However, unpredictable soft and hard tissue outcomes are often the problem. This course aims to cover all aspects related to immediate implant placement procedures.

IMMEDIATE IMPLANT PLACEMENT: SURGICAL STEPS AND TREATMENT PLANNING FOR PREDICTABLE OUTCOMES

DR. FAZEELA KHAN OSBORNE AND DR. NIKOLAS VOURAKIS

Date: 18th May 2024

Venue: Crumlin Road Gaol Visitor Attraction
and Conference Centre, Belfast, Ireland

53-55 Crumlin Road Gaol, Belfast BT14 6ST

Fee: £350

Register here

AIMS AND OBJECTIVES

- 1 Understand case selection for immediate implant placement according to the indication on the literature.
- 2 Learn treatment planning and Assessment for management of immediate implants.
- 3 Discuss extraction techniques and drilling protocols in the post extraction site: Incisors premolars and molars.
- 4 How to approach the extraction to prevent any damage to the buccal bone.
- 5 Manage complications like:
 - Poor primary stability
 - Buccal fenestration
 - Dehiscence's
- 6 How to preserve or gain keratinized mucosa around the implant to provide a better biological and aesthetic long-term result.
- 7 Immediate placements with immediate loading from the 'S' Line provisional to the final restoration.

PROGRAMME

8:30 - 9:00 Registration

9:00 - 13:00 Morning session

- Introduction to immediate implantology and provisionalisation
- Patient selection, Assessment and treatment planning
- Surgical principles
- CBCT analysis
- Tooth extraction protocol
- Medication
- Implant design selection
- Protocol for immediate implantology
- Complications and Management
- Bone grafting decision

14:00 -17:00 Afternoon session
Practical on Pig heads

DR. FAZEELA KHAN OSBORNE
FCGDent FICD FCOI
Msc.BDS (Lon)
BSC(Hons) LDS.
RCS(Eng) DRDP Dip.
Imp.Dent.(RCS.Eng)
Adv.Cert

Dr. Khan Osborne is the founding clinician of the FACE implant multi-disciplinary team both on the surgical and restorative side, for One To One Dental Clinic based in Harley Street, London.

After qualification, Fazeela held several surgical posts in *Oral & Maxillofacial Surgery*, before studying for a *MSc in Restorative Dentistry/ Gerodontics* which she received with Distinction.

She has always had a passion and *special interest in Implant Dentistry: both on the surgical and restorative full arch rehabilitation of the maxilla*, and has been involved in developing treatment modalities for Peri-implantitis within clinical practice.

She is the *Course Lead for PG Diploma In Implant Dentistry for One To One Education Programme* now in its 20th year.

A former Lead Tutor and Assessor for the Royal College of Surgeons, (Diploma In Implant Dentistry) and accredited Mentor; she lectures worldwide on Implant Dentistry and is an active member of the ADI, BAAD,ICOI. with Prof. Marcus Abboud on the Post-graduate Implant Programme at Stonybrook University (USA) running a joint programme in Muco-gingival surgery for Implant Dentistry with Prof Cristian Dinu (Romania); and also twinning the Advanced Implant Dentistry programme with Dr Howie Gluckman in Cape town, (South Africa). She lives in West london with her 2 children.

DR. NIKOLAS VOURAKIS
DDS, MSc

Dr Vourakis special interest and main qualification is in Oral Implantology while he has wide experience in all forms of dentistry.

Nik has been a practicing dental surgeon since 2005 after graduating from the prestigious *Military Academy Medical School at the University of Thessaloniki, Greece*. For 2 years undertook training at Oral and Maxillofacial Department in 401 Military Hospital in Athens. As a military dental surgeon, he then went on to serve as a *team leader in a field hospital in Afghanistan from 2006-2007* - an experience which shaped his commitment and dedication to his chosen field.

On returning to Greece, opened his own private dental practice which he ran with great success from 2007 - 2016, *specializing in oral surgery implants and aesthetic dentistry*. Since early 2017 Nik is practicing oral surgery and implantology in private clinics in Edinburgh and London.

Nik has regularly and dedicatedly attended further education programs, seminars, workshops and courses both nationally and internationally. *He holds a Post Graduate Diploma in Oral Implantology from Ethnikon Kapodistriakon University of Athens and a Master of Science Degree (MSc) in Oral Implantology from Goethe University of Frankfurt Germany*. These masterclass courses involved a variety of procedures ranging from master courses in vertical and horizontal bone grafting and sinus surgery grafting procedures through soft tissue management to implantology, prosthetics and dental aesthetics.
