

2024 Education and Event Catalogue

www.megagen.co.uk

Greetings from the CEO and team

Dear Colleague,

In 2024 Megagen Implants UK & Ireland is completing its 14th year of trading in the United Kingdom and Republic of Ireland. Since 2011 we have been serving the dental community, bringing innovation and cutting-edge technology to the market. Not too many people gave us a chance in the beginning but here we are. Those that stood by us all those years ago, still stand by us and we still stand by them today. We thank you all.

It has been 12 years since we introduced our AnyRidge Implant system to the market. At that time, it seemed like an avant-garde concept and only very few embraced it. But what we claimed about this product has proved to be true – AnyRidge is a revolutionary product, thoroughly designed to the smallest detail. AnyRidge is THE biology-driven implant system.

For 12 years we have aimed to deliver educational content of the highest calibre from the best speakers in the world. Our domestic events are well known in the UK for both the scientific details and the sophistication of the hands-on sessions. The international events from HQ, including the International Megagen Symposium are true examples of scientific and organisational excellence.

We partner with some of the top institutions and educators in the UK by supporting their events, both logistically and scientifically. We also maintain a close support relationship with the following dental professional organisations and associations: ADI, BAAD, BACD, Dentine Tubules, ACE, ICE and more. You will always find us in the exhibition area at their events.

In 2018, we stepped our game up and opened an in-house CAD/CAM facility – the R2Gate Centre UK & Ireland. We are committed to the belief that the future of dentistry is digital and empowered by this belief, we have been teaching hands-on courses and the practical use of guided surgery both in our own lecture facility in Luton as well as off site. Hundreds of people have been trained with us since then and we pride ourselves in being the most advanced digital platform on the market.

In 2020 the world was turned upside down by Covid-19. Life as we knew it changed, our lives and professions ground to a standstill. We did our best to remain optimistic, threw caution to the wind, and have revamped all our business processes, including investments in software frameworks aimed at improving our customer service and satisfaction.

During this period the world also witnessed a huge surge in online education. Megagen has long been at the forefront of creating and distributing online education content. It all came down to the realisation that when all this is over, the content will still need to be available. So, we took to the task of creating a first: a massive education library organised using modern educational software frameworks: Megagen Inspire platform.

2024 is the year that this library will see the light in the monitors. We will keep you posted.

Oh, and I almost forgot: It is so good to be back to face-to-face events! Let's hope that 2024 will be the year when our lives get back to normal. To the NEW and ENHANCED NORMAL.

I look forward to seeing you all again and shaking your hands. Enough of this nonsense fist bumping. :)

Dima Corduneanu, CEO

January

Sinus Augmentation: How and When?

17th January
London, UK

📍 Royal College of Physicians

This programme aims to demystify the techniques and indications for using internal sinus lifts and lateral window sinus grafts. This course is aimed at practitioners who have had some implantology experience and wish to further their knowledge and hands-on experience in Sinus Augmentation.

Course participants will learn the practical skills necessary to augment bone in the maxillary sinuses, and the research underpinning these procedures, allowing them to appropriately prescribe and perform these procedures for patients.

Dr. Koray Feran
BDS MSc FDSRCS FCGDent FICD

Koray qualified in 1989 from Guy's Dental Hospital, winning the Final Year Prize for overall excellence and the S. J. Kaye Prize in Oral Medicine and Pathology. Between 1991 and 1993 he completed the Master of Science degree in Periodontology.

In 2005 he founded The London Centre for Implant and Aesthetic Dentistry (LCIAD Ltd.) in Wimpole Street at the heart of London's dental and medical community.

Koray is recognised amongst his peers as a trusted and highly competent clinician for care of patients with multidisciplinary treatment needs and accepts referrals from over 70 colleagues for patients. He is known for his successful multidisciplinary approach to dealing with complex cases requiring dedicated surgical and restorative branches of dentistry especially on cases with failed previous dental work.

AIMS AND OBJECTIVES

- Understand the principles of Assessment, treatment planning and surgical approaches to GBR.
- Review the biomaterials used in Guided Bone Regeneration and their indications.
- Selection and Preparation of Biomaterials.

March

Immediate Implant Placement

2nd March
Birmingham, UK

📍 Hyatt Regency Birmingham

We will describe the scientific background of the procedure and the possibility of using immediate implants for the replacement of hopeless teeth. Immediate implant placements have many advantages such as fewer surgical procedures, decreased treatment time and faster patient results.

However, unpredictable soft and hard tissue outcomes are often the problem. This course aims to cover all aspects related to immediate implant placement procedures.

IMMEDIATE IMPLANT PLACEMENT: SURGICAL STEPS AND TREATMENT PLANNING FOR PREDICTABLE OUTCOMES

DR. FAZEELA KHAN OSBORNE AND DR. NIKOLAS VOURAKIS

Date: 2nd March 2024

Venue: Hyatt Regency Birmingham
2 Bridge Street, Birmingham, B1 2JZ, UK

Fee: £350

Learning Outcome: GDC outcome C CPD hours: 7 hours

March

IAA X Agnini Game Changer

14th - 17th March
Modena, Italy

📍 Ferrari Museum

Management of the anterior esthetics:
surgical, prosthetic and digital rationale

The lecture will emphasize on identifying the
risk factors to successful esthetic outcomes
specific to tooth replacement within the
Esthetic Zone.

Partial Extraction therapies

The loss of teeth will lead to resorption of
the buccal plate with its resultant need for
extensive augmentative procedures (both
bone and soft tissue) as well as the risk of
poor long term aesthetic stability.

[Register here](#)

The poster for the IAA & Agnini Italy Experience March 2024 features a background image of a yellow Ferrari sports car. At the top, the IAA logo and 'IMPLANT & AESTHETIC ACADEMY' are displayed. The main title 'IAA & AGNINI ITALY Experience March 2024' is prominently shown. Below the title, a paragraph invites participants to broaden their horizons through lectures and hands-on sessions by the Agnini brothers and Professor Howie Gluckman. A vertical timeline on the right side details the event schedule: 14 March (Arrive in Modena, Italy, Group Dinner), 15 March (Lecture & Hands on Prof Howie Gluckman, Ferrari museum & factory tour), 16 March (Lecture and hands on: Agnini Brothers, Gala dinner), and 17 March (Depart Modena). The bottom of the poster includes the hashtag #gamechangers and the email lara@implantacademy.co.za. A group photo of the event organizers is shown at the very bottom.

IAA IMPLANT & AESTHETIC ACADEMY

Socket Shield Technique: Simplified Approach to Complex Protocol

13th of September
London, UK

📍 TBD

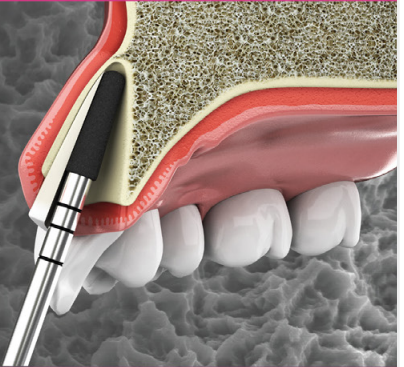

Partial Extraction Therapy is a revolutionary technique in dentistry that aims to preserve the maximum amount of hard and soft tissue while providing optimal implant placement. Being able to work with the biology allow us to achieve best results possible. This technique allows for the integration of dental implants in compromised extraction sockets, resulting in improved aesthetic outcomes and long-term stability. In this course, participants will gain a comprehensive understanding of the principles, protocols, and clinical applications of PET.

"Excellent learned so much in one day... has changed how I will work in future."

"Great presentation and support materials."

"Brilliant lecture. Fantastic theories, clinical practice and approach. He has changed my patient care."

"I will recommend future courses to colleagues."

"Excellent presentation, very detailed – thoroughly enthusiastic."

"Excellent course, best course I have been on in years – more like this!"

"Very well presented and interactive."

"A revelation today!"

"Very good – clear and engaging presenters. Plenty of time for questions."

"One of the most informative lectures that I have attended. It was refreshing for someone not to sell a product but teach biology. Thank you and well done to the Megagen team."

We are passionate about providing first class education to implant placers.

We strive to improve the quality of patient care by delivering evidence-based teaching to bridge the gap between science and clinical practice.

We could not achieve this without the support, opportunities and platforms offered to us by our Education Support Network.

From us all at Megagen Implants UK & Ireland,
Thank you!
