Innovate, Simplify, Succeed: The Future of Implantology

Treating patients with severe bone loss has traditionally meant complex surgeries, grafting, and unpredictable results. The ARi and Blue Diamond Cuff implant change that. These innovative solutions provide stability, optimize soft tissue management, and allow for a minimally invasive approach. In this lecture, I will show clinical cases where these implants helped turn difficult situations into straightforward successes.

20 Upper Ground, London SE1 9PD, UK

DR. ROKAS KUPRYS

DDS, MSc

Dr. Rokas Kuprys, DDS, MSc, is an accomplished oral surgeon and internationally recognized lecturer, bringing advanced clinical expertise and a strong academic foundation to the field of implantology. Based at the Panevezys Implantology Center in Lithuania, he is a respected member of the Scientific Society of Oral and Maxillofacial Surgery and a distinguished MINEC Knight. His clinical focus encompasses guided surgery, implantology, and comprehensive soft and hard tissue management, with particular expertise in ARi and BDC implant systems. Known for his clear, practical teaching style and evidence-based approach, Dr. Kuprys is dedicated to empowering clinicians to achieve predictable, high-quality outcomes in modern implant dentistry.

DR. HASSAN MAGHAIREH

BDS, MFDS RCS (Ed)
MSc Implants

Dr. Maghaireh is an aesthetic implant dentist from the United Kingdom and is the Head of Scientific Committee of the British Academy of Implant & Restorative Dentistry (BAIRD). Dr Maghairah has a special interest in evidence based implant dentistry and he runs a implant referral practice at Leeds Dental Implant and Cosmetic Clinic where he accepts Implant Referrals for advanced cases from all around U.K. He is an ITI Fellow, ITI Speaker and ITI Study Club Director, Leeds. He has published many dental implant systematic reviews and random controlled clinical trials with special emphasis on soft and bone tissue management in the aesthetic zone. He is on the editorial board of the Journal of Clinical Trials and a co-author at Cochrane collaboration.

DR. YUSUF ALSHAFI

BDS, MFDS, RCSEd, MSc

Dr Yusuf Alshafi is actively involved in postgraduate education and is an experienced teacher in implant dentistry and oral surgery through structured programmes, hands-on surgical courses and clinical mentoring. He is a regular contributor to professional publications and clinical literature within the field of implant dentistry and is committed to advancing evidence-based practice. He graduated from Guy's, King's and St Thomas' Dental Institute in 2007 and completed an MSc in Dental Implants in 2018. He undertook hospital training as a Senior House Officer in Oral Surgery and Restorative Dentistry at Guy's Hospital and obtained Membership of the Faculty of Dental Surgeons at the Royal College of Surgeons of Edinburgh. His academic and teaching work is informed by a broad clinical background encompassing advanced implant and surgical procedures.

DR. SALEH ARIA

DDS, MSc

Dr. Saleh Aria is a forward-thinking clinician and Principal Dentist at The Harrow Dental Practice, renowned for his innovative contributions to dental care. He founded the Esthetic Dental Academy to offer advanced educational resources for dental professionals, emphasizing high-level techniques and technology. A pioneer in laser dentistry, Dr. Aria currently chairs the International Committee of the Academy of Laser Dentistry (ALD), highlighting his global influence. Holding an MSc in Dental Lasers, he actively participates in prestigious organizations such as the Association of Dental Implantologists, International Team for Implantology, British Dental Association, World Clinical Laser Institute, and International Society of Laser Dentistry. His clinical expertise spans dental implants, bone and ridge augmentation, soft tissue management, and sinus floor elevation, allowing him to manage complex cases with innovative methods for optimal patient outcomes.
