THE MASTERCLASS

YOUR PRE-RECORDED LEARNING

- 01 Periodontal outcomes, risk assessment and supportive therapy
- 02 Peri-implantitis: aetiology and treatment protocols
- 03 Perio-plastic procedures: gummy smiles, gingival contouring, grafts, frenectomies, haemangiomas, vestibular deepening and reverse vestibuloplasty
- 04 Laser-assisted periodontics and regeneration
- 05 Laser-assisted peri-implantitis
- 06 Laser procedures for soft tissue, implants and everyday dentistry

PLUS +

Pre-recorded protocol and instructional videos for perio, peri-implant and soft tissue laser procedures

The lectures provide the base of knowledge so that the two-day masterclass can focus on hand-on practice and improving your skills and filling in any gaps practically.

HANDS-ON PROCEDURES

Using minimally invasive techniques and/or lasers:

Periodontal care

- Perio pocket management
- Flap design and regeneration
- Gingivectomy and crown lengthening
- Connective tissue and free gingival grafts

Soft tissue procedures

- Soft-tissue enhancement for implant placement
- Lip repositioning and depigmentation
- Frenectomy and vestibular deepening
- Haemangioma removal

Implant dentistry

- Peri-Implantitis management – surgical and non-surgical
- Soft tissue enhancement for implant placement
- The laser periosteal and flaps for implants
- Socket debridement and conditioning
- Laser implant surgery, including immediate placement and all-on-X

Further laser applications

- Laser endodontics
- Photobiomodulation

Note: Some of these procedures will be laser-specific and in many cases, you will have the opportunity to focus on particular procedures that relate to your practice and focused area of improvement.

YOUR FACULTY

Dr Rana Al-Falaki

SPECIALIST PERIODONTIST & INTERNATIONAL SPEAKER

Dr Rana Al-Falaki is a multi-award-winning pioneer in laser-assisted periodontics, recognised internationally for her work in minimally invasive treatment and flapless bone regeneration. Her protocols are being adopted for wider clinical trials at institutions including Harvard and King's College.

With more than 30 years in healthcare, she combines clinical expertise with her work as an executive and leadership coach, best-selling author and international speaker. Before selling her specialist clinic, she led it through five consecutive years of awards for periodontal practice, innovative treatments and clinical excellence. In 2025, she was named among Dentistry's Top 50 for her contribution to clinical excellence and professional wellbeing.

Rana is the founder of NAIL-IT In Dentistry and creator of the award-winning NAIL-IT Leadership System. Her teaching brings a fresh, engaging approach to understanding clinical techniques and applying them in practice.

Dr Robin Horton

GENERAL, IMPLANT, LASER & DIGITAL DENTISTRY

Dr Robin Horton is the owner and principal dentist at Wayside Dental Practice in Harpenden. He is a Fellow, board member and education panel member of the Academy of Laser Dentistry, and a Fellow of the World Clinical Laser Institute.

His laser journey began in the early 1990s with a diode for soft tissue surgery and periodontal pockets. He introduced Waterlase in 2006 and now has four Waterlase systems and five diodes at his practice. All eleven clinicians are laser trained, and all nurses hold laser safety certificates.

Robin has taught laser techniques in general and implant dentistry for more than 20 years in the UK and internationally. A keynote speaker and key opinion leader, he also has particular expertise in digital dentistry, including scanners, navigated surgery, photogrammetry, CAD/CAM and 3D printing.
